

VTM Forecasting

DESCRIPTION

- An information service that is aimed at supporting resourceplanning by nautical / operational service suppliers in the port of Rotterdam.
- To achieve this, VTM Forecasting will supply reliable planninginformation by combining early-warning ship movement information (from various sources), statistical data and experience factors.
- Based on this approach, Royal Dirkzwager will supply tailor-made information for the subscribers' planning departments.

The screenshot displays the 'Mainport Match' web application. It features a navigation menu with 'Login', 'VTM Forecasting', and 'Loggeerd als: Dirkzwager'. Below the menu are buttons for 'Uitloggen', 'Eenheid toevoegen', 'Eenheid verwijderen', 'Tabel toevoegen', and 'Tabel verwijderen'. The main content area is titled 'VTM Forecasting (aanvragen)' and contains a table with the following columns: 'Rij', 'Looptijd', 'Type', 'Looft', 'Schip', and 'Looft op: D E E ETATG'. The table lists various ship arrivals and departures with their respective details.

Rij	Looptijd	Type	Looft	Schip	Looft op: D E E ETATG
